The course aims to introduce the latest research developments on early signs of autism spectrum disorders (ASD) in the first two years of life and early intervention paradigms for infants at high-risk for ASD. We will discuss the criteria for classifying infants at high risk for ASD, identify DSM-5 diagnostic changes in the ASD diagnostic criteria, and summarize the empirically based screening and assessment methodology in ASD.

This course will prepare you to recognize the presence of risk factors and/or early warning signs of ASD and be familiar with screening and assessment tools to ensure that infants at high risk for ASD are being identified and provided with the appropriate programs and services. We will also discuss the most recent technological and therapeutic advancements in infants at high-risk for ASD.

OBJECTIVES

- Identify current diagnostic procedures
- Identify potential indicators that may affect diagnosis
- Recognize early intervention paradigms
- Think outside the box for signs and interventions for autism

Registration

spahp.creighton.edu/OTCE17

Register by Thursday, August 31, 2017. Space is limited.

Registration fee:
- $25
- Creighton alumni, faculty or preceptors: $20
- Occupational therapy students: $10
